You should touch base with Priscilla on this before sending out anything. FYI – I did find him in the online EPA directory of employees.

Scott will try to figure what we can tell him if he's not CBI cleared. Thus far, I find no hits in a couple of systems.

Anna, Scott,

We are conducting an investigation of Freedom Industries in regard to the chemical release and drinking water contamination by chemicals this company had on site.

We are looking for any information that your office may have on this company and the chemicals they have:

MCHM/Sureflot

Ex. 5 - Deliberative

We would also be interested in other chemicals they have as well.
